San Jose Market Recap

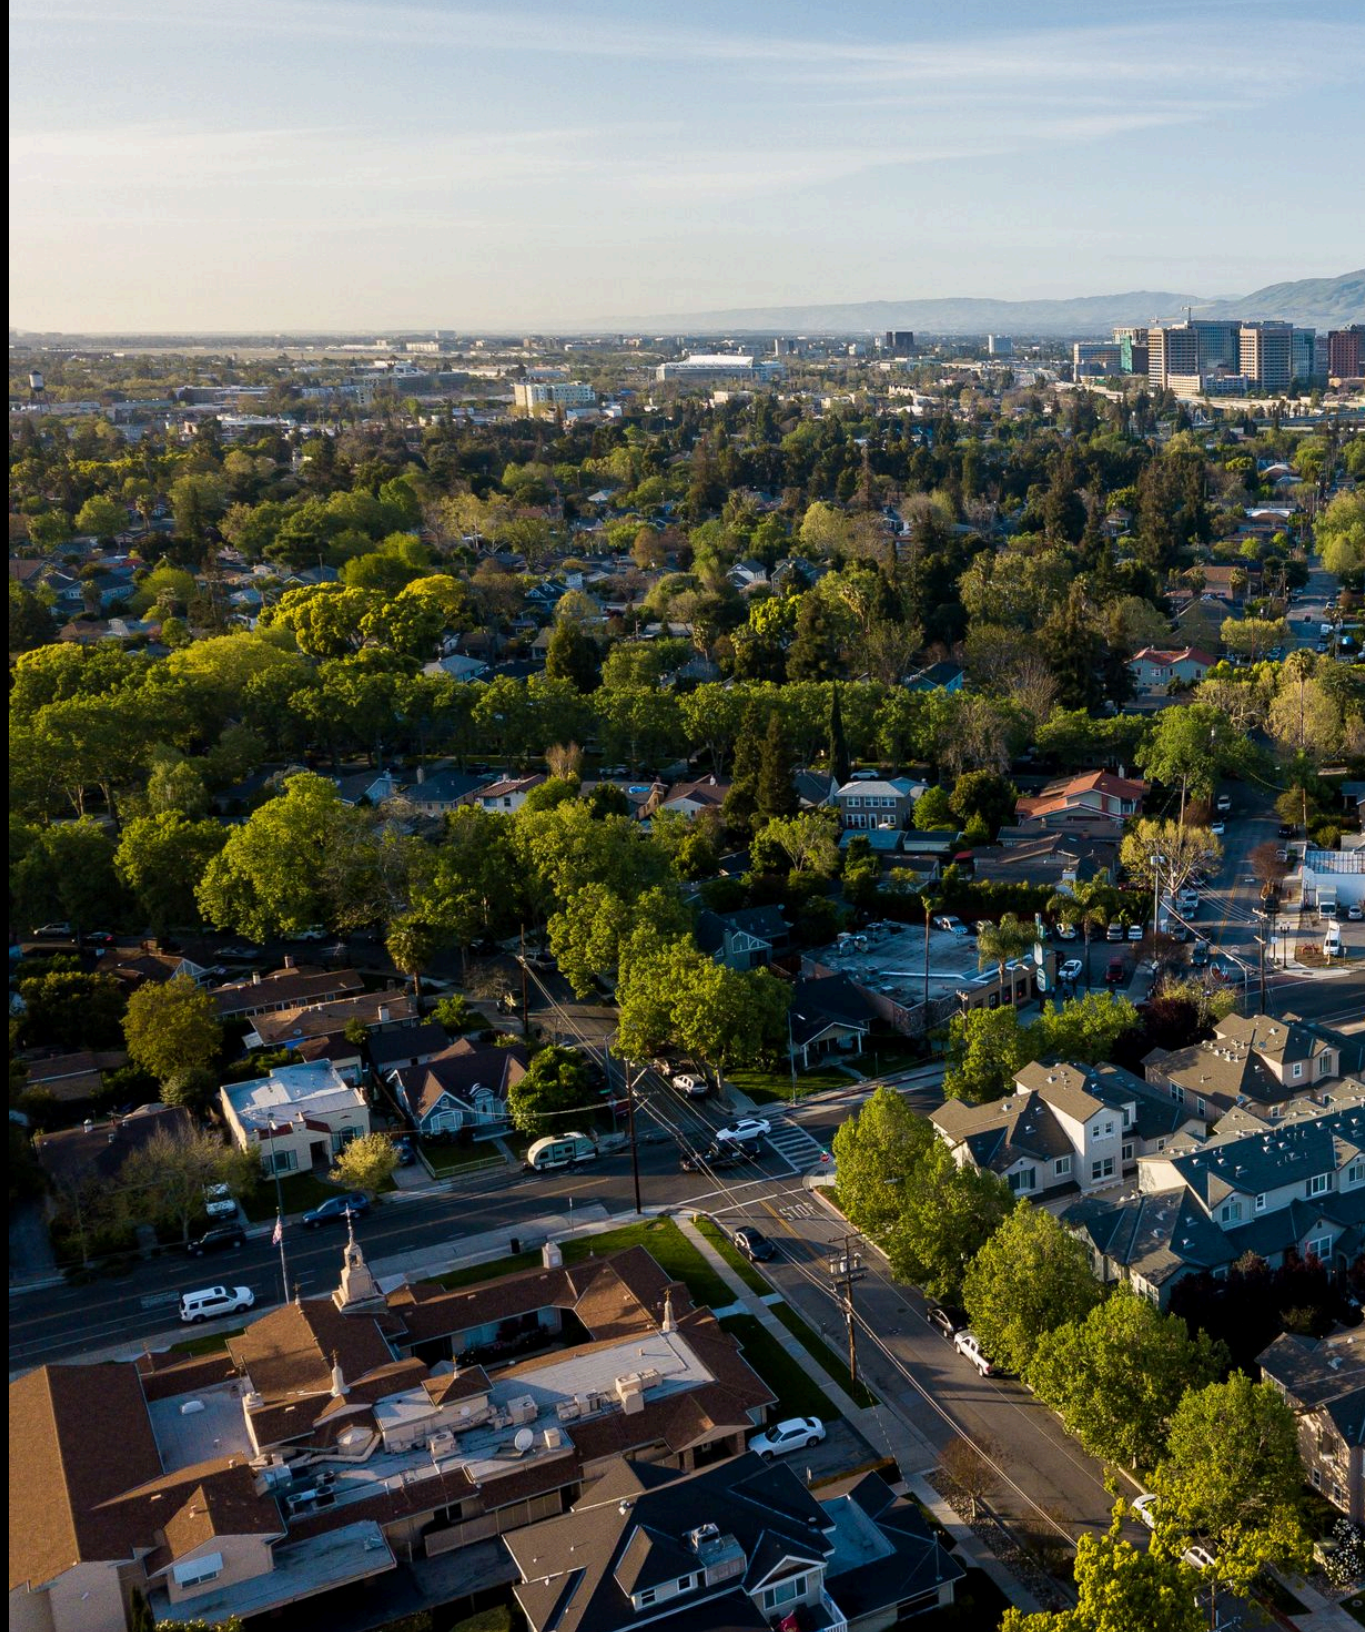

Overall Market Sentiment

San Jose's single-family market softened in October, with buyers gaining leverage as listings built up and sellers cut prices. Closings fell 20% from a year ago to 308, the fewest for an October since at least 2020, while active listings rose 37% to 624, the most for an October since at least 2020. Months of supply rose to 2 from 1.2, and the median was essentially flat at $1,583,000, down 2%. Bidding wars are fading but still common, with 46% of homes selling above list. Condos were steadier, with more closings and a slightly higher median.

- Sales: 308 single-family homes closed in October, down 20% YoY and 18% from September, the fewest for an October since at least 2020. Condo closings rose 10% YoY to 78.
- Prices: The single-family median fell 2% YoY to $1,583,000. The condo median rose 1% YoY to $630,000.
- Competition: 46% of single-family sales closed above list, down 12% YoY. Condo overbidding was 19%, up 1%.
- Inventory: Active single-family listings rose 37% YoY to 624, the most for an October since at least 2020, while new listings were flat at 407. Condo active listings rose 3% to 319, also the most for an October since at least 2020.
- Single family: Days on market was 27 days, from 26 a year ago, while months of supply rose to 2, the highest October level since at least 2020. Price reductions rose 56% YoY to 290, with the reduction rate up 10% to 39%, both the highest October levels since at least 2020.
- Condos: Condo days on market fell 10% to 55 and months of supply eased to 4.1 from 4.4. New condo listings fell 18% to 108, while 47% of condo listings took a price cut, up 3% and the highest October level since at least 2020.
- MoM: New single-family listings fell 18% from September and active listings rose 5%, pushing months of supply to 2 from 1.6. Price reductions rose 17% and the reduction rate rose 8%, while the median rose 1%.
- Bottom line: Still a seller-leaning single-family market by supply, but cooling quickly, with more inventory and price cuts; condos are steady.

San Jose Market

Report created in good faith using public and proprietary data from sources deemed reliable but may contain errors and is subject to revision. Data is pulled at the end of the month, and last-period figures may still be preliminary due to late-reported activity. All numbers are approximate and may change, including Private Exclusive sales and other transactions not publicly reported at the time of publication.

How to Read This Report: County and Submarket Guidance

This November 2026 report covers 21 markets in Northern California: 15 counties and 6 submarkets. Each market summary compares October 2026 with October 2025 (YoY) and September 2026 (MoM).

This report is organized by property type, with single-family and condo metrics presented separately. Single-family median sale price and closed sales time-series charts have been formatted for easier reading.

- Source: Compass via MLS; data exported 11/5/2026 and 11/6/2026, with data through 10/31/2026.
- Please note, data for October is preliminary: Late MLS reporting may add closings for approximately two weeks after month-end.
- Small samples: Results for markets with fewer than 30 closings per year should be interpreted with caution.

COMPASS INTERNATIONAL HOLDINGS

November 2026
Northern California Housing Market Report

In October, county real estate markets across Northern California split evenly along inventory lines: active single-family listings fell year over year in seven counties and rose in the other seven. Markets with shrinking inventory saw stronger competition and pricing, while those with growing inventory saw more buyer leverage and more frequent price reductions.
Markets that tightened included San Francisco, Marin, San Mateo, and Alameda. San Francisco led the region in competitiveness, with 86% of single-family homes selling above list price and the single-family median up 29% year over year to $2,390,000. Marin's active listings fell 28% and its median rose 9%. In San Mateo County, the median increased 10% to $2,200,000, the highest October median since at least 2020, supported by 66% of sales closing above list.

Contra Costa, Sonoma, Santa Cruz, and Napa presented mixed conditions. Contra Costa and Sonoma both had fewer active listings than a year ago, yet price reductions became more common. In Santa Cruz, closings and the median held steady, though 51% of single-family listings underwent price reductions, the highest share in the region.

Softer market performance was observed in Santa Clara, Sacramento, Placer, El Dorado, Solano, and Monterey. Santa Clara's median rose 6%, but active listings expanded 27%, price cuts rose 50%, and it was the only county where the share of homes selling above list fell. In the greater Sacramento region, falling closings and expanding inventory drove price reduction increases of 39% in Sacramento, 34% in Placer, and 38% in El Dorado (where supply expanded to 4.3 months).

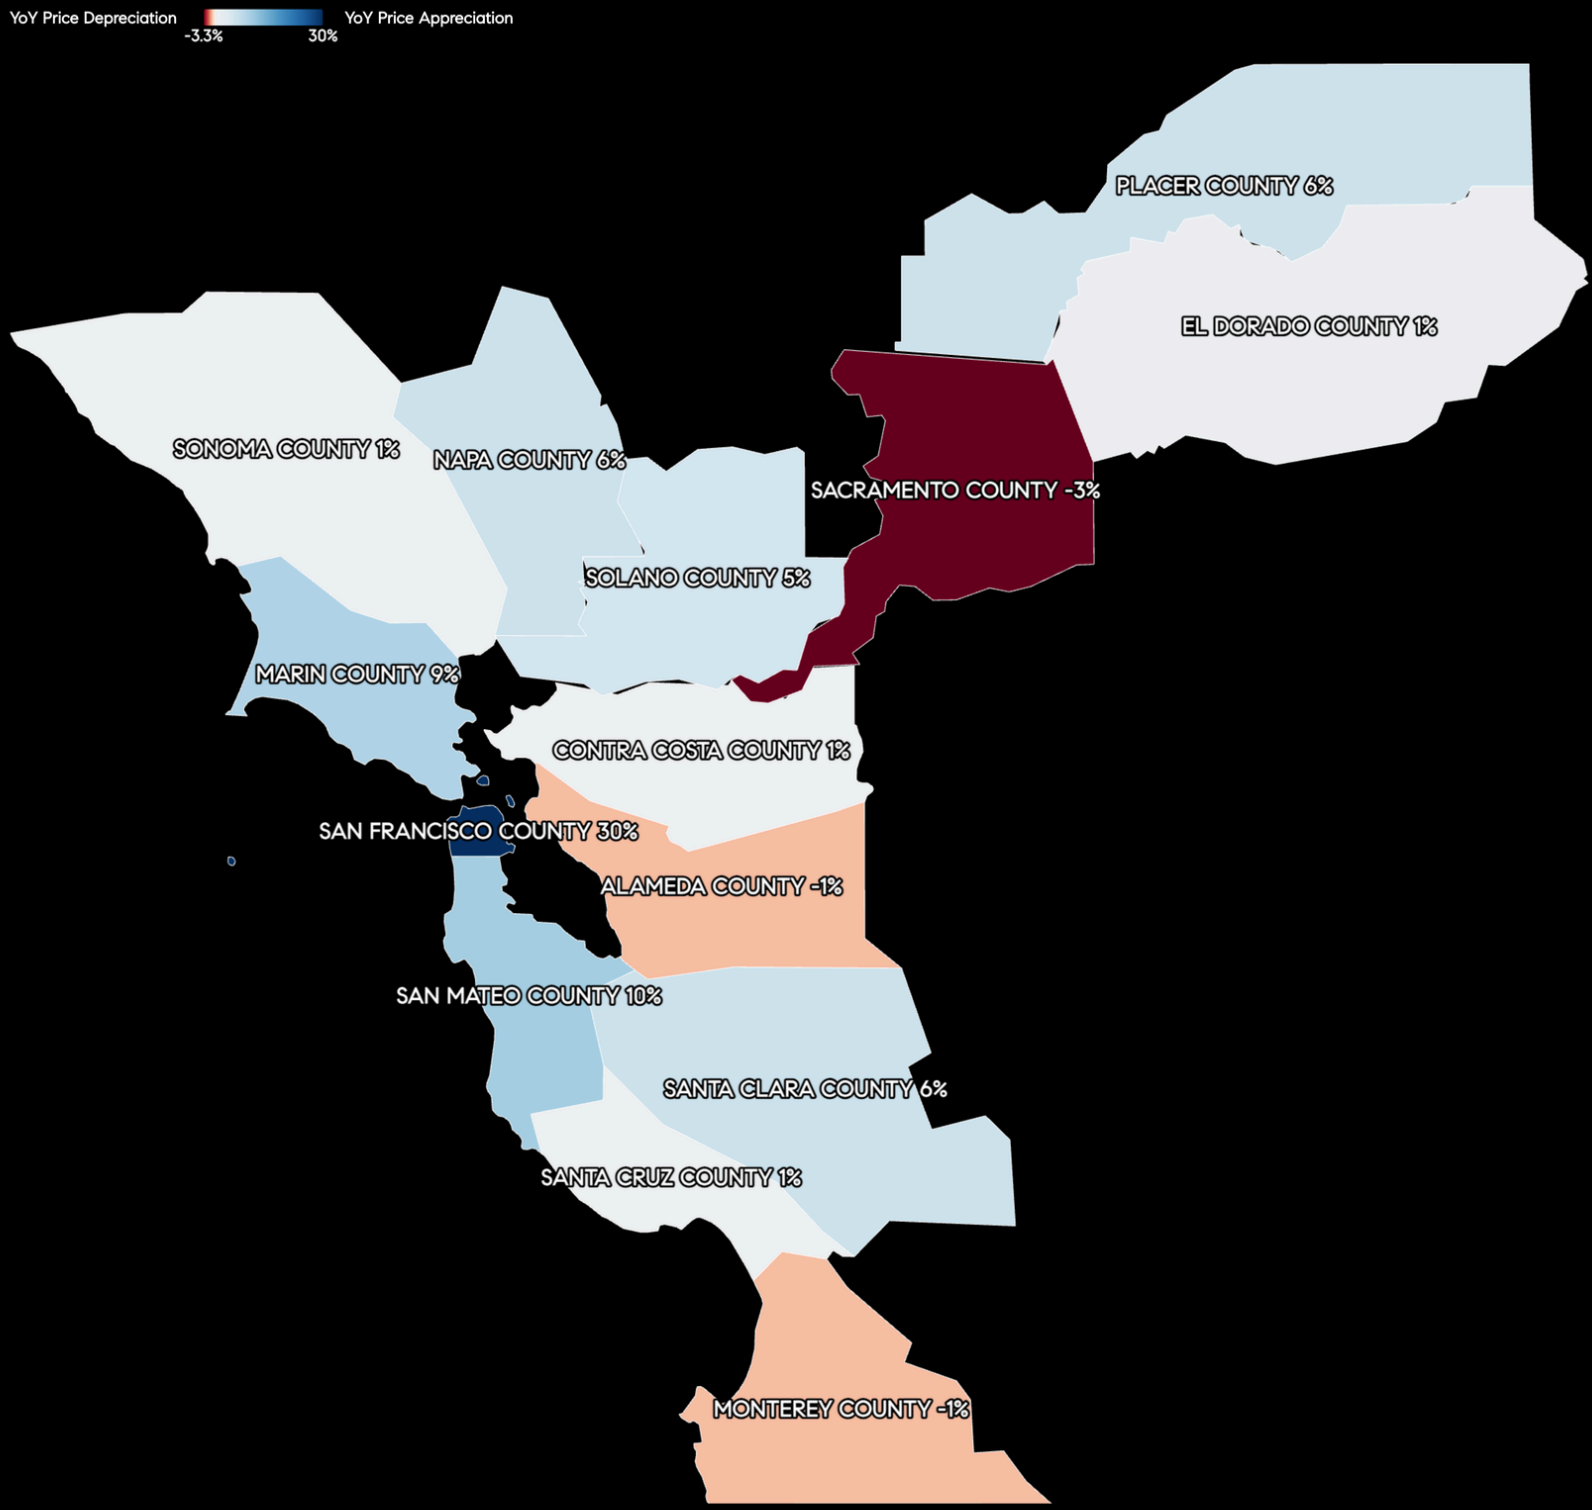

Condominium market performance generally lagged single-family properties, with condo closings down year over year in 10 of 14 counties. San Francisco stood out again, where the share of condos selling above list rose 25% to 68% and the condo median rose 12%; condo market conditions also improved in Alameda and San Mateo.

November Outlook: The fall listing wave is fading. New single-family listings fell from September in all 14 counties, by 38% in Marin and 43% in Napa, while the share of listings with a price cut rose in all 14. In tight markets, thinner inventory should keep competition strong into the holidays. In softer markets, the pace of price cuts will indicate whether sellers are adjusting to buyer leverage before the winter slowdown.

Note: October figures are preliminary; late MLS reporting typically adjusts closing tallies for approximately two weeks following month-end. Source: Compass via MLS (data through 10/31/2026, exported 11/6/2026). Comprehensive county-level summaries are available in the NorCal Market Summaries — October 2026 report.

Regional Price Changes in Northern California

San Francisco leads regional price growth at +30%, while Sacramento County posts the largest decline at -3%, highlighting a wide range of performance across Northern California counties.

November 2026
Economic Outlook

This section looks at the economic forces shaping the national and Northern California housing markets through October and into November.

In April, a powerful jump in tech company valuations, both public and private, fueled buyer demand, especially for higher-end homes in San Francisco through the summer. Now, with mortgage rates near 7.5% in early fall, buyer demand has slowed dramatically. Pending home sales in October were about 15% below last year, and Northern California is tracking close to the rest of the country.

The AI boom is a double-edged sword for the Bay Area. It's helping draw movers from pricey metros like Seattle and Washington, DC. But as some of the frothiest parts of the AI buildout pulled back, the Nasdaq fell about 12% from its early-October peak. That matters locally because tech headcount is only back to 2019 levels, while tech pay, much of it in stock, has roughly doubled. The pullback did come with a silver lining: mortgage rates fell nearly 40 basis points, a small green shoot after a rough stretch for homebuyers. With inflation still well above the Fed's 2% target and markets expecting a December hike, though, lower rates aren't guaranteed to last.

Despite light demand, U.S. housing fundamentals remain solid. Foreclosures are near historic lows, and national home prices are up about 2% from last year.

Mike Simonsen
Chief Economist
Compass International Holdings

The section of this report are select macro-economic and demographic data for the country and the Bay Area.

Still-Too-High Inflation

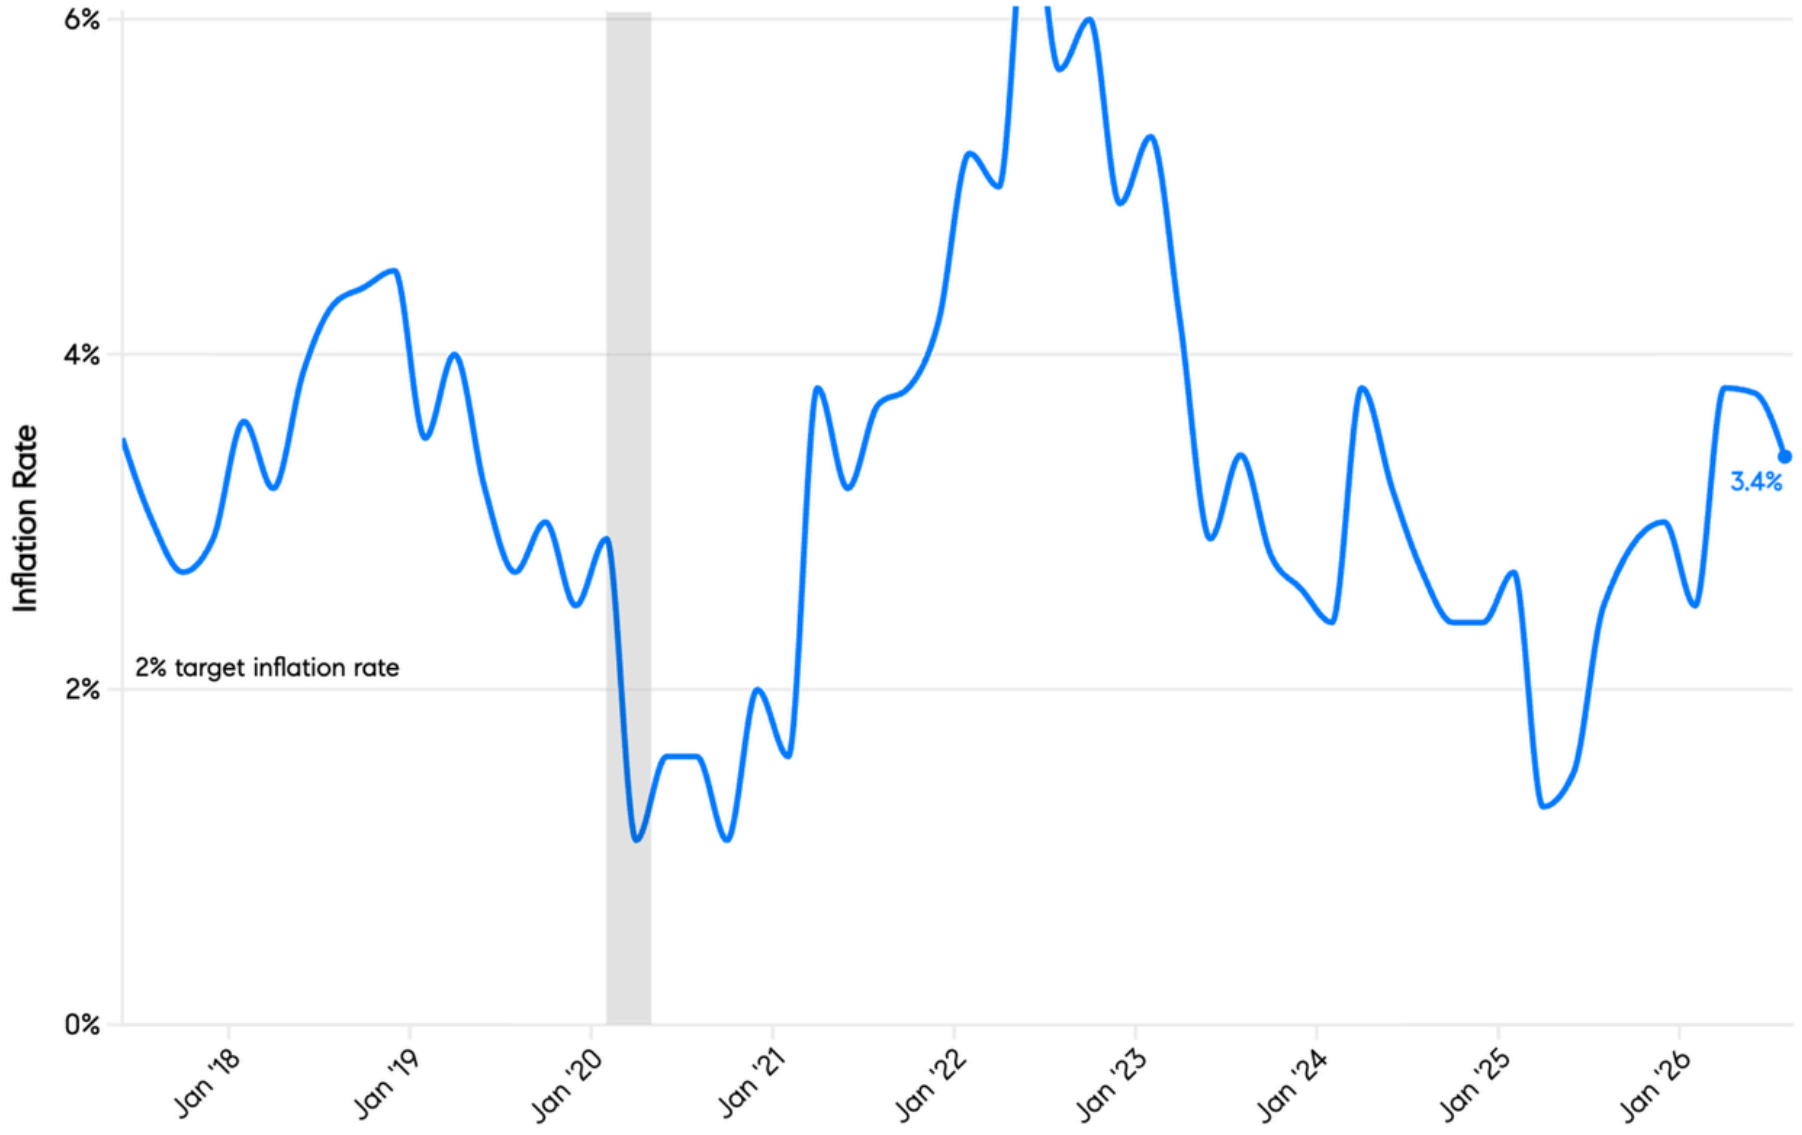

Inflation data in recent months is moving higher again and is well above policy maker's target levels. Volatile energy markets and government spending keep inflation fears persistent.

Source: US BLS, BEA

Bay Area Inflation Persists

For a couple years post-pandemic, home price and rent declines in the San Francisco Bay Area kept inflation in the region below the national averages. Rents have been climbing recently and that has driven local inflation back up.

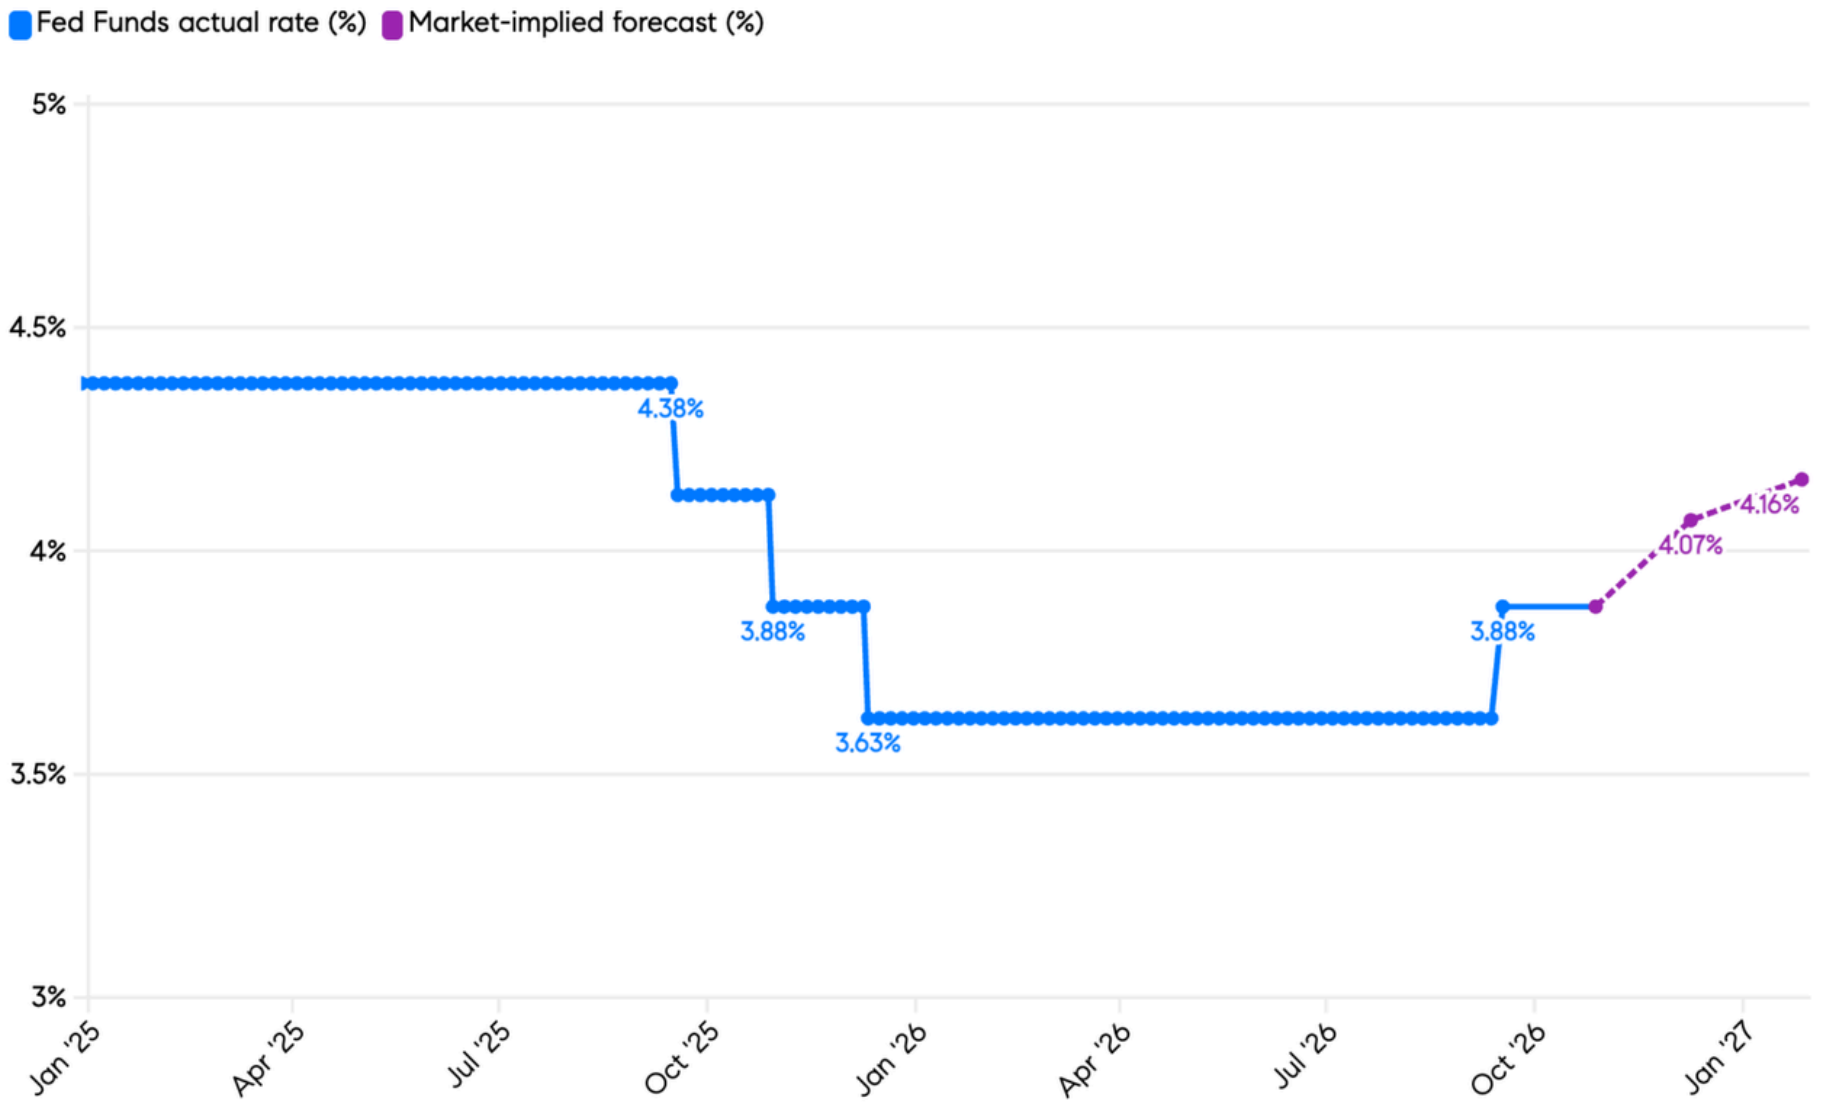

Source: US BLS

COMPASS INTERNATIONAL HOLDINGS

Markets Expect Continued Fed Hikes

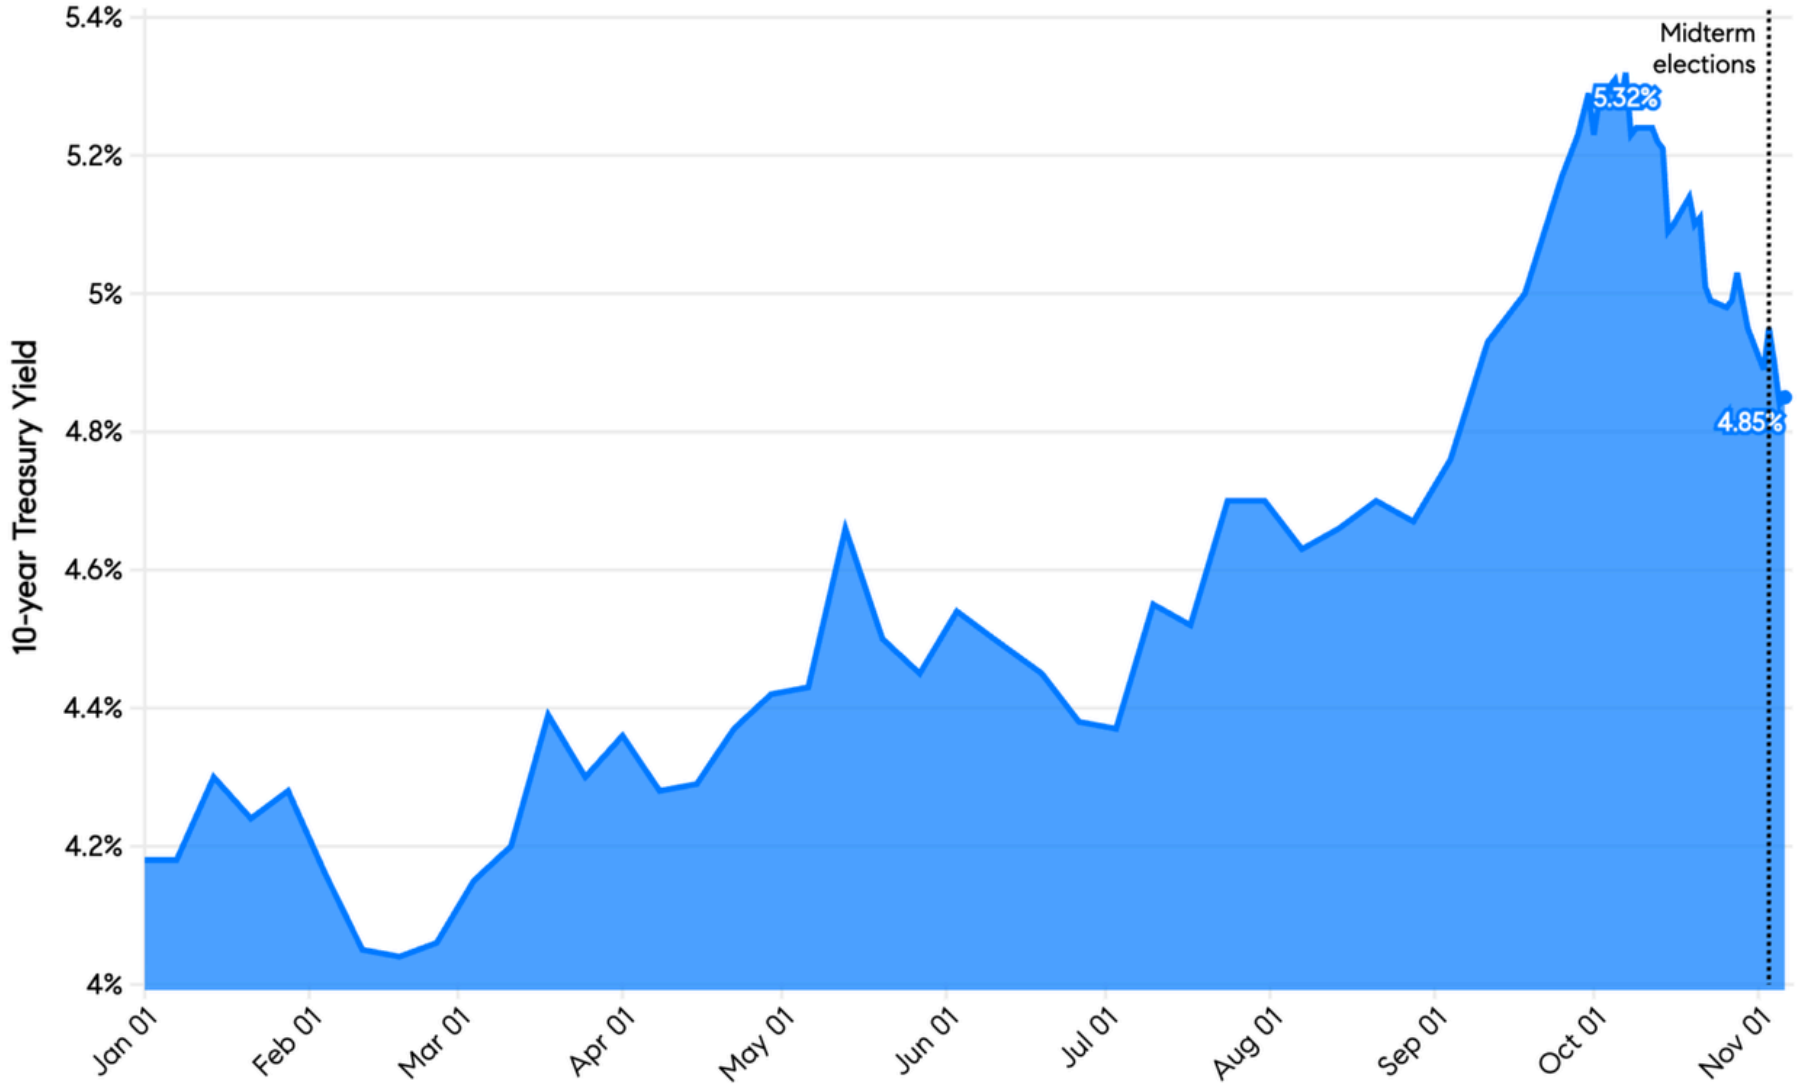

In October the Federal Reserve Open Market Committee held interest rates steady after a hike in September. Bond markets forecast a December increase moderately likely. Expectations of interest rate increases are growing more likely into 2027.

Source: CME FedWatch, Fed Funds futures-implied probabilities; historical effective rate from Federal Reserve

10-Year Interest Rate Improved in October

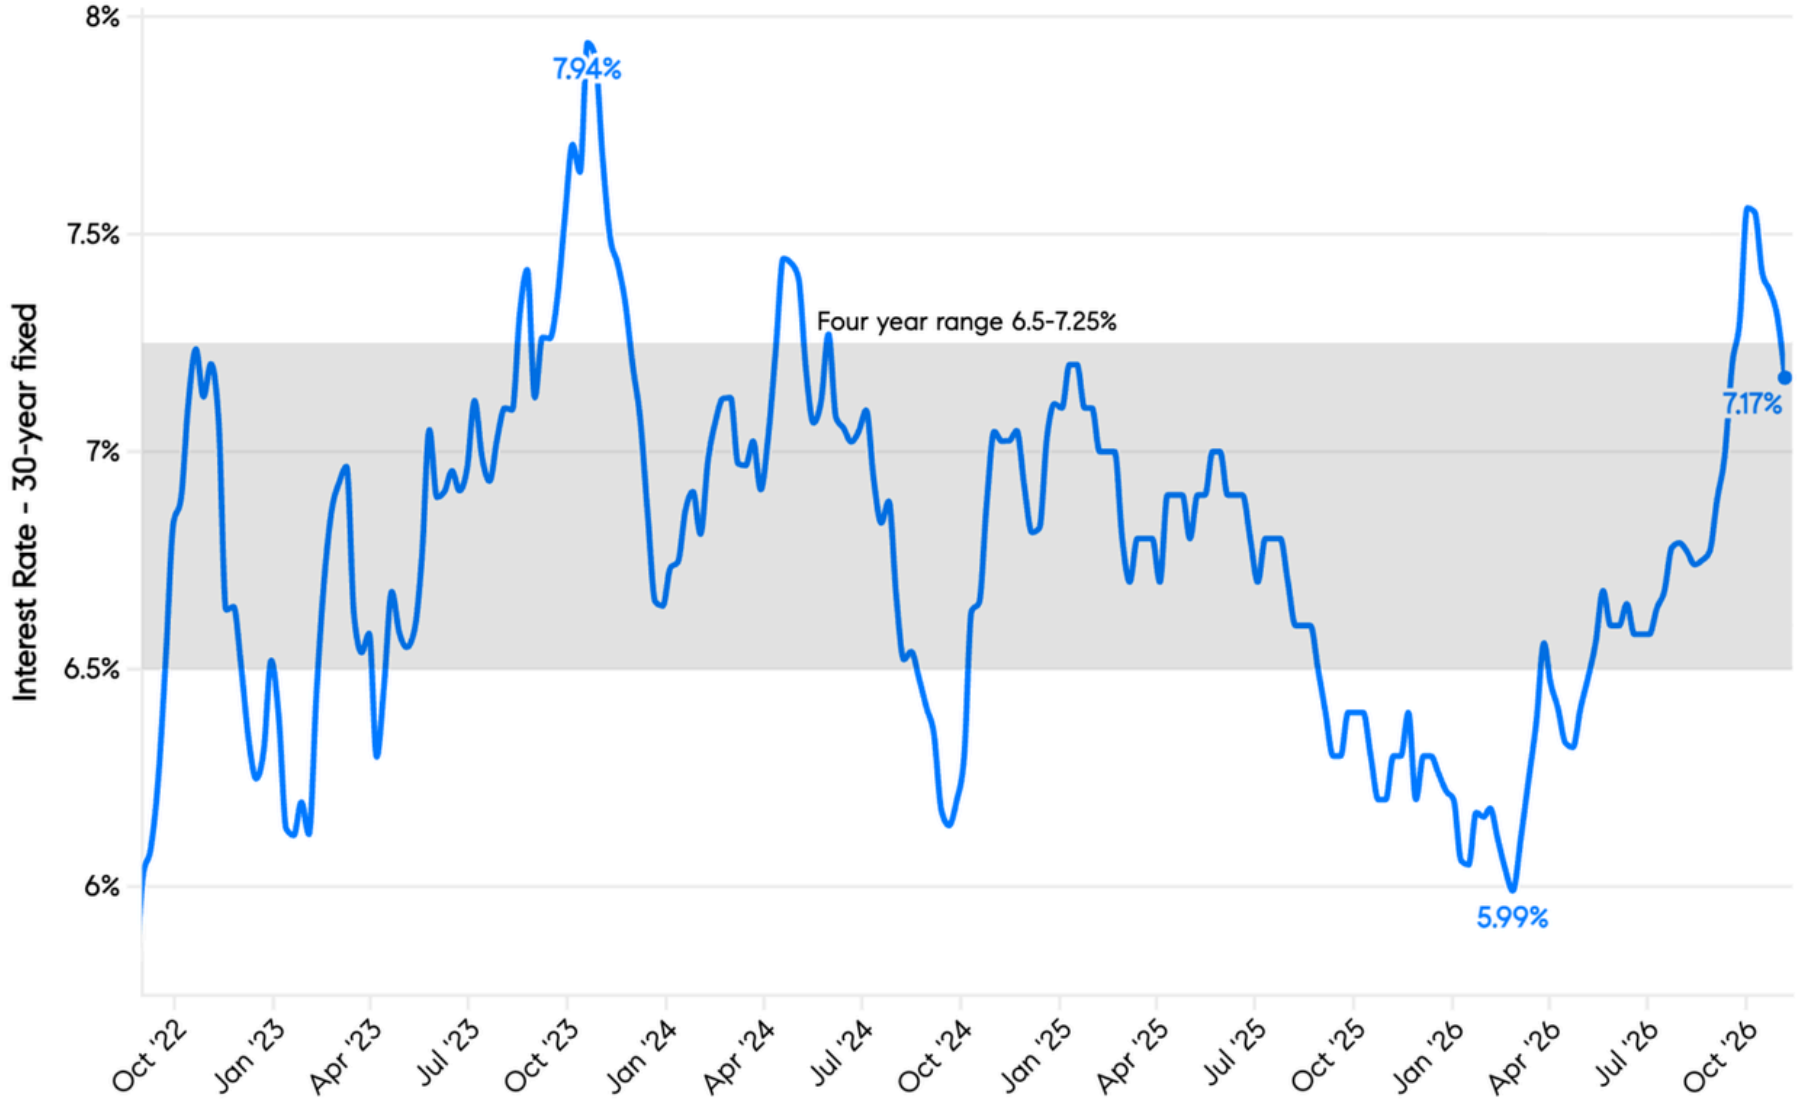

After surging to 25 year highs in September, the yield on the 10-year Treasury has receded and moved sharply lower in the days after the midterms. The interest rate on a 30-year fixed rate mortgage is largely driven by the Treasury yield.

COMPASS INTERNATIONAL HOLDINGS

Mortgage Rates Pull Back from Recent Highs

The 30-year fixed rate mortgage rate has backed off the recent highs, though is still at the high end of the four-year range, slowing buyer demand across the country.

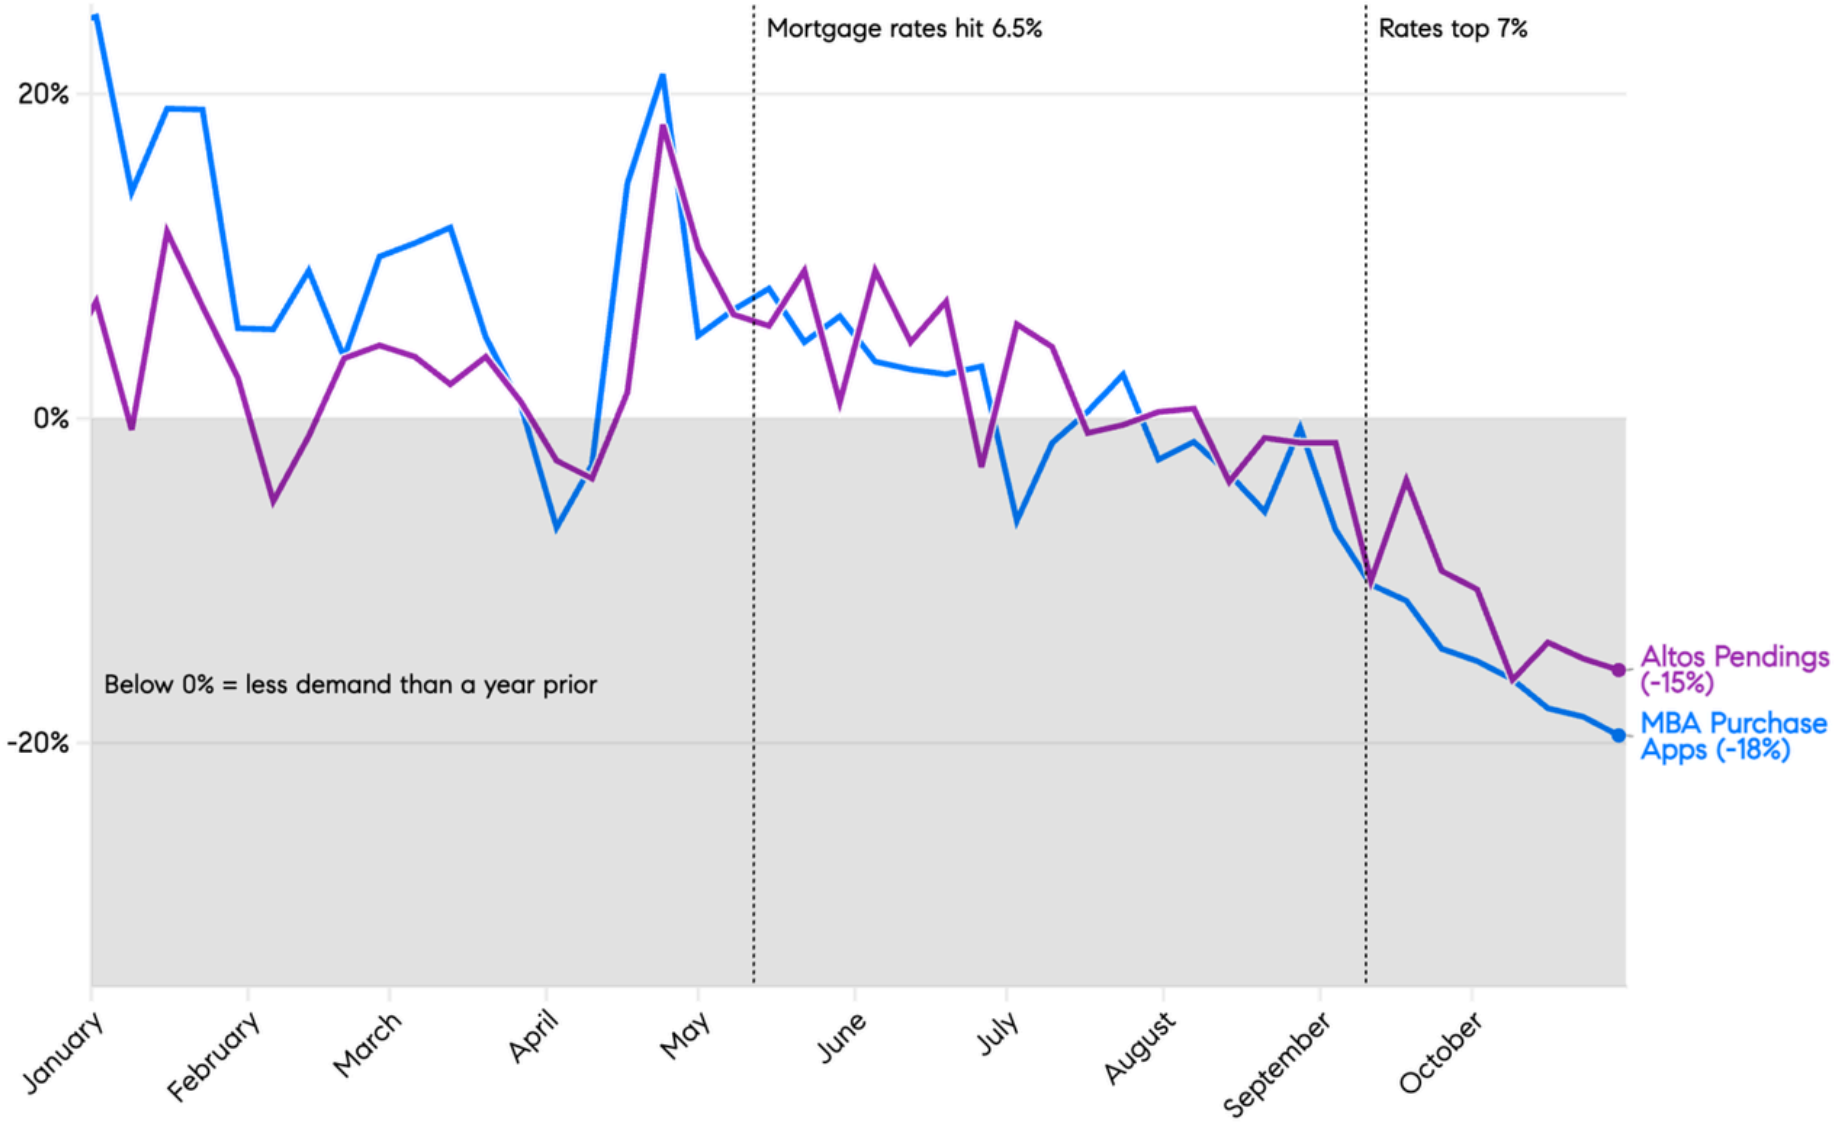

Source: Mortgage News Daily, Compass

COMPASS INTERNATIONAL HOLDINGS

Watch These Leading Indicators

Nationally, home buyer demand slowed dramatically in September and October as mortgage rates spiked. After growth in the second quarter, the leading indicators for home sales are now running 15-20% fewer than last year.

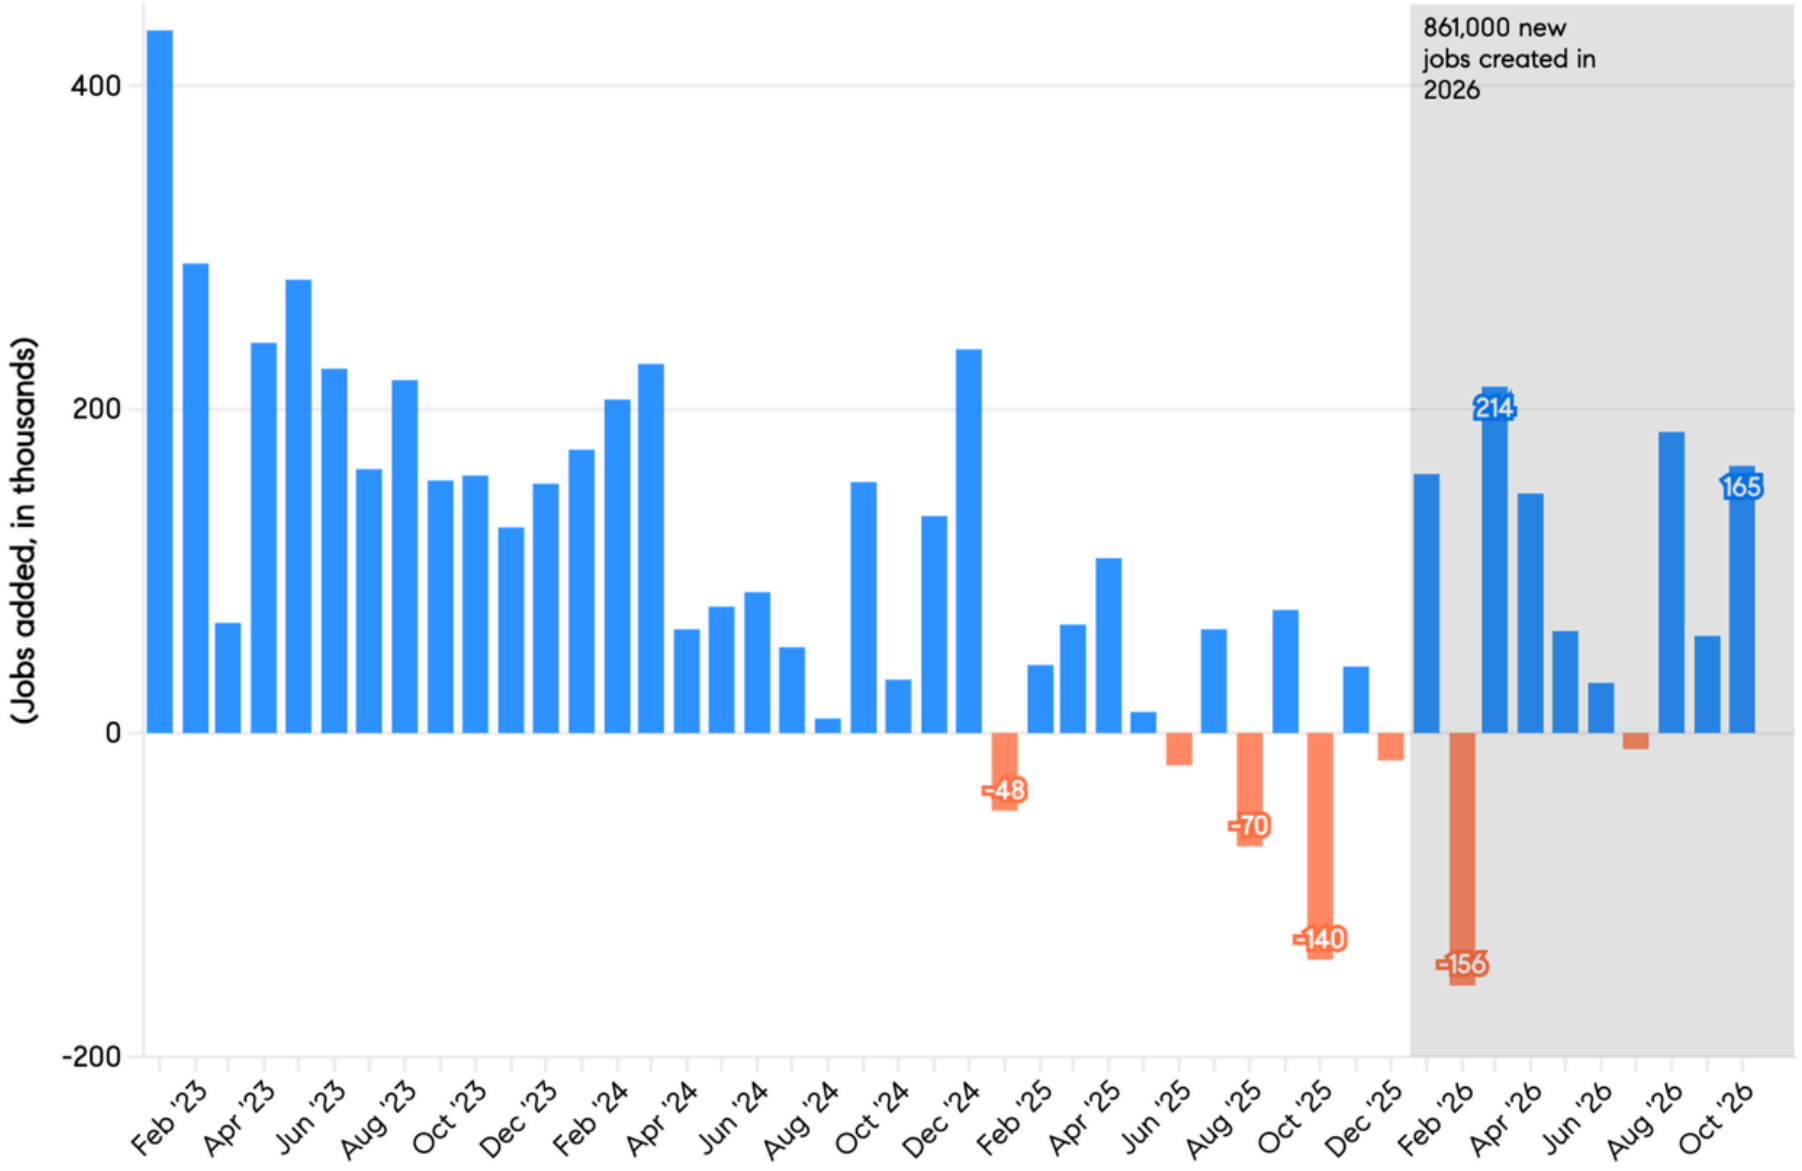

Source: Compass, Altos Research, Mortgage Bankers Association, Xactus · Data as of Oct 30, 2026

COMPASS INTERNATIONAL HOLDINGS

Job Growth Improved in October

Employers added 165,000 jobs in October and recent months estimates have been revised higher.

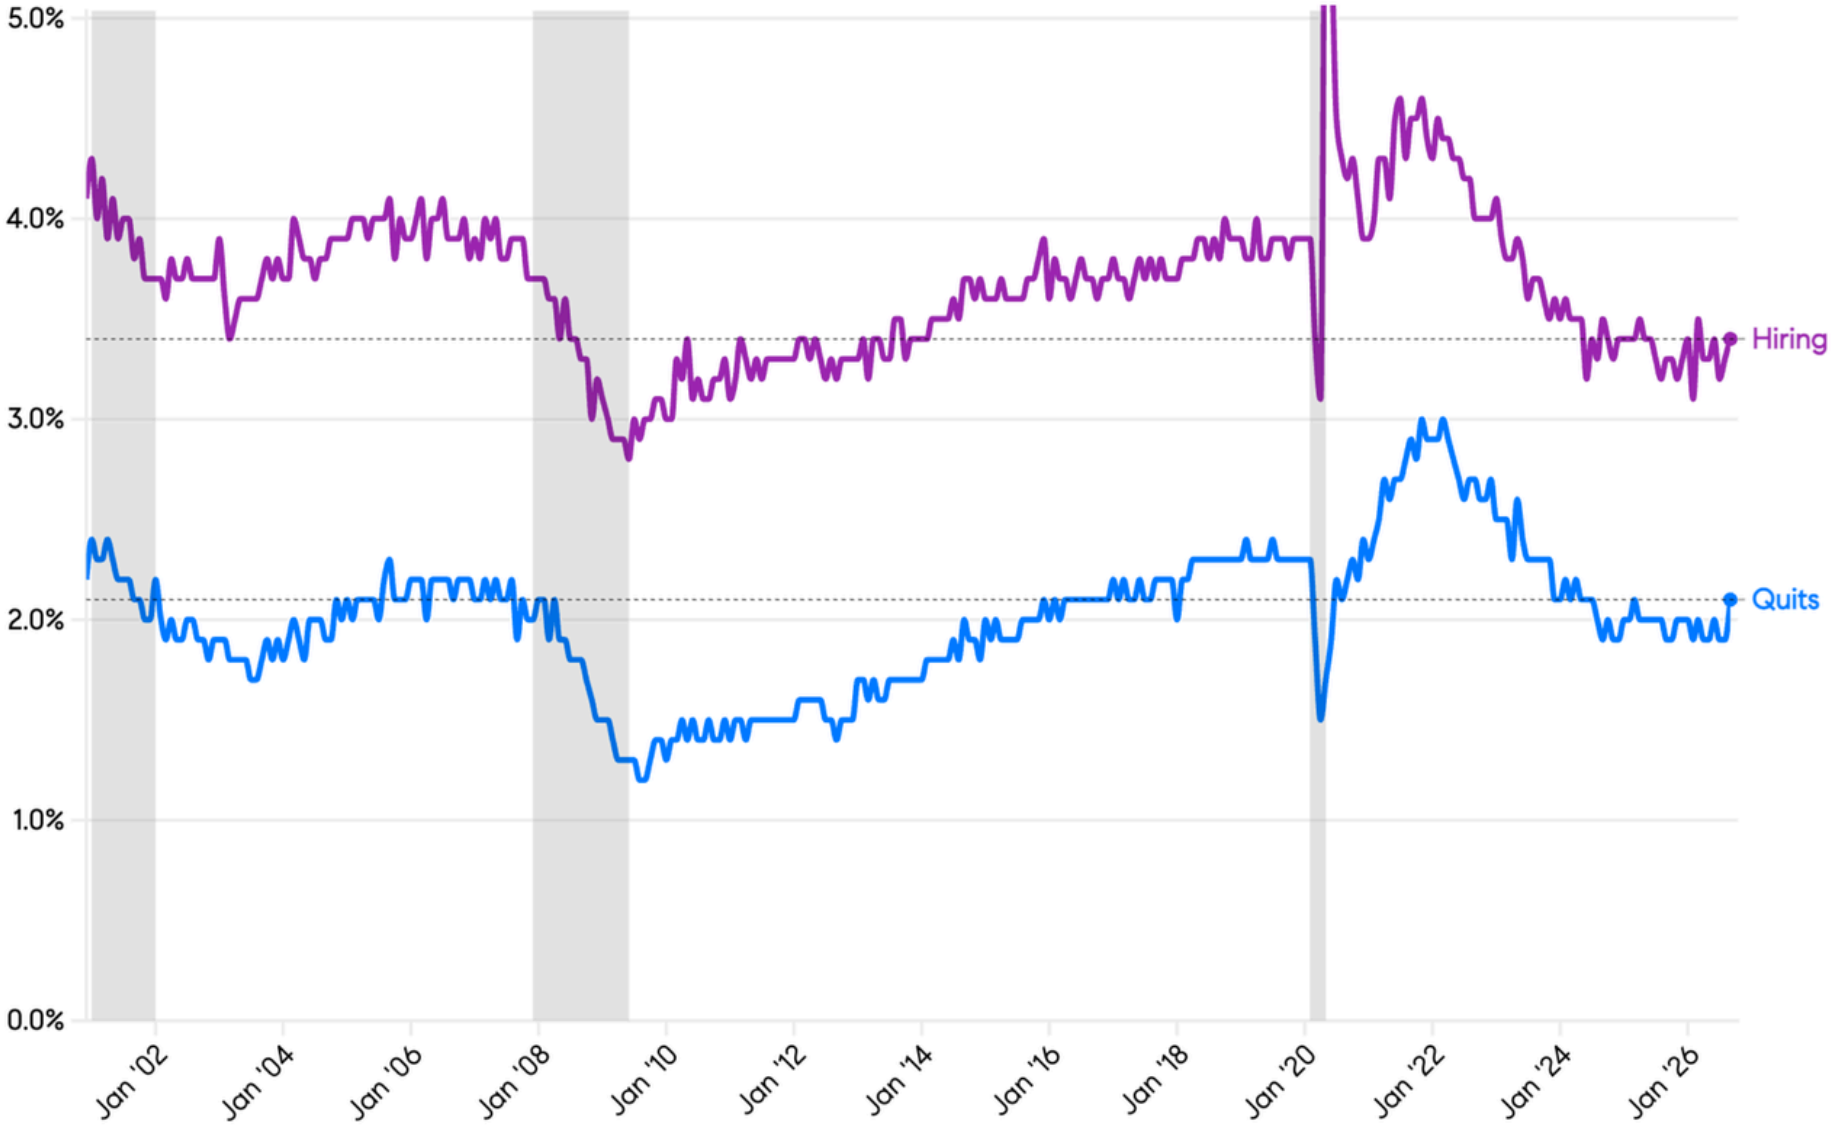

Source: BLS Non-Farm Payrolls, Total jobs, seasonally adjusted

COMPASS INTERNATIONAL HOLDINGS

Encouraging National Jobs Data in October

Nationally, unemployment remains low. In 2027, as the hiring rate and quits rate both trend higher, implies more relocation for work in 2027 both from and to Northern California.

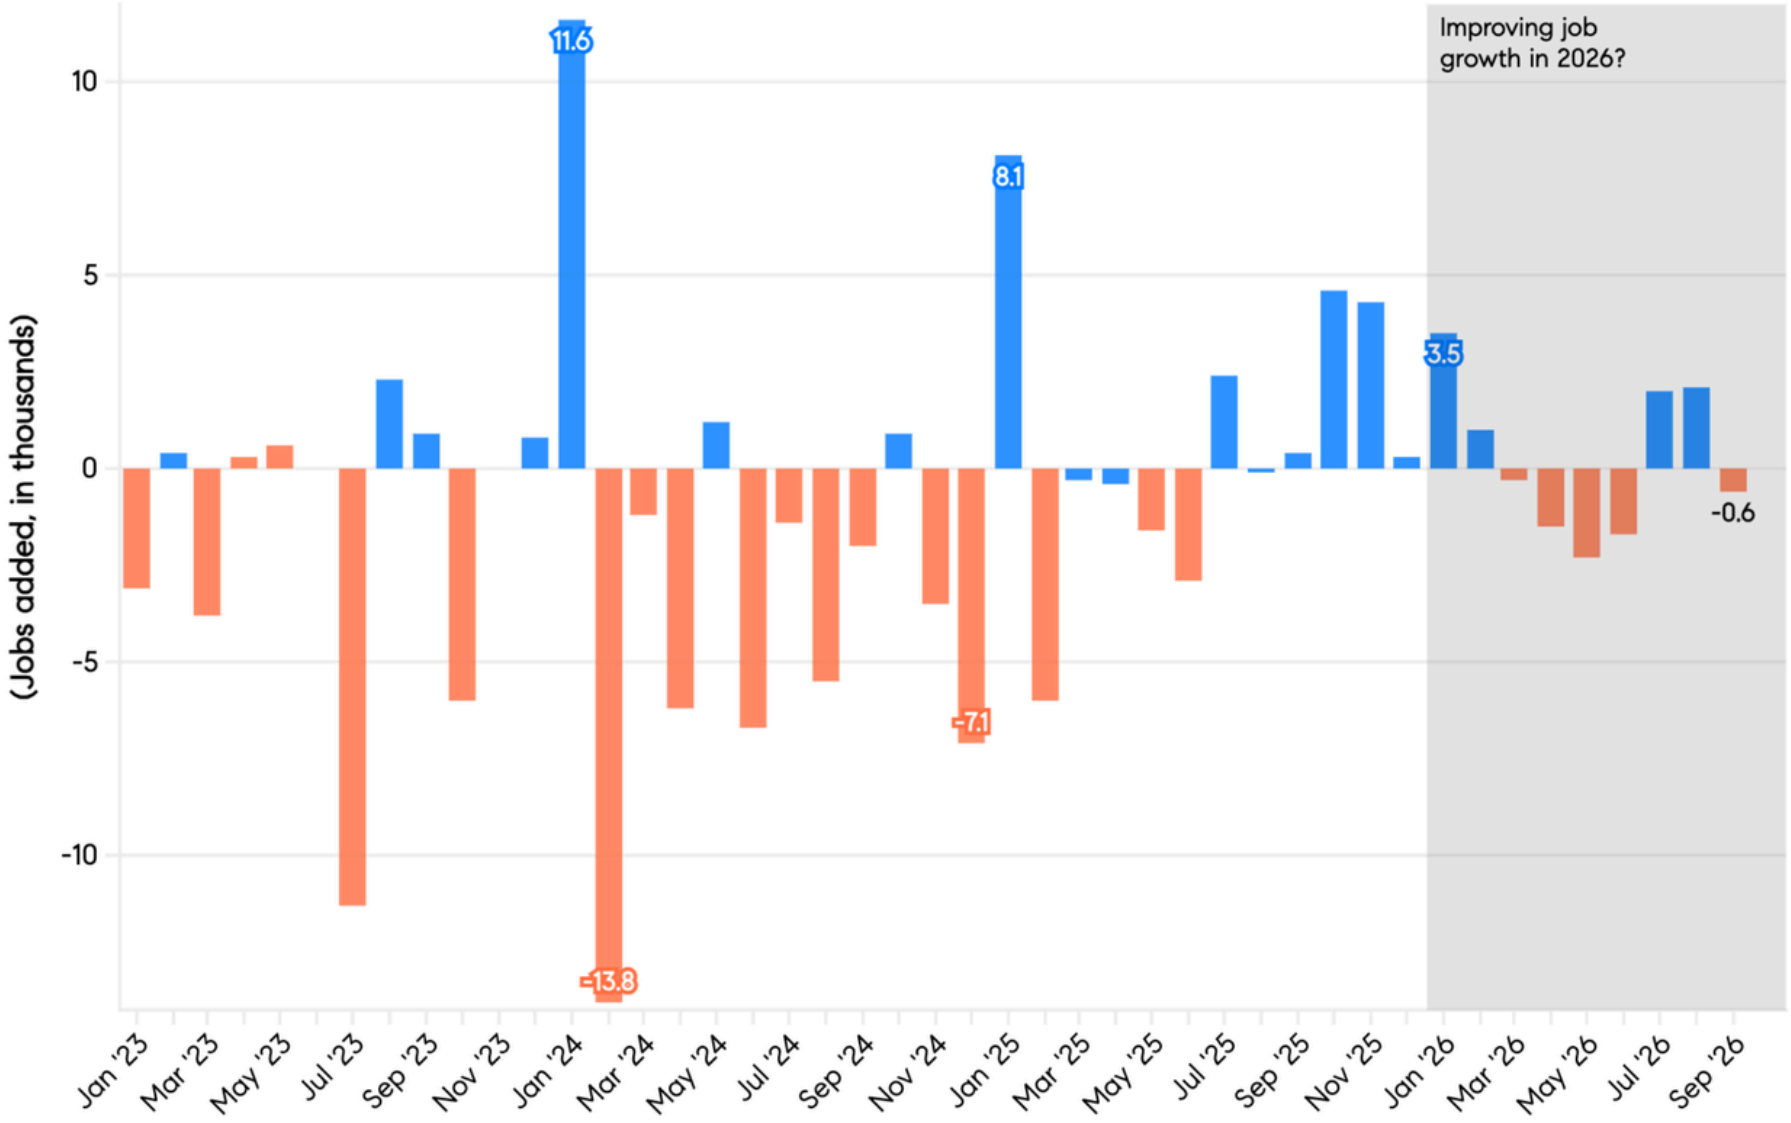

Source: BLS JOLTS labor market survey · Gray shaded areas are recessions.

COMPASS INTERNATIONAL HOLDINGS

Bay Area Job Growth Stabilizes

Total payrolls for the San Francisco Metro area have increased slightly in 2026, recent stabilizing after several years of sharp declines.

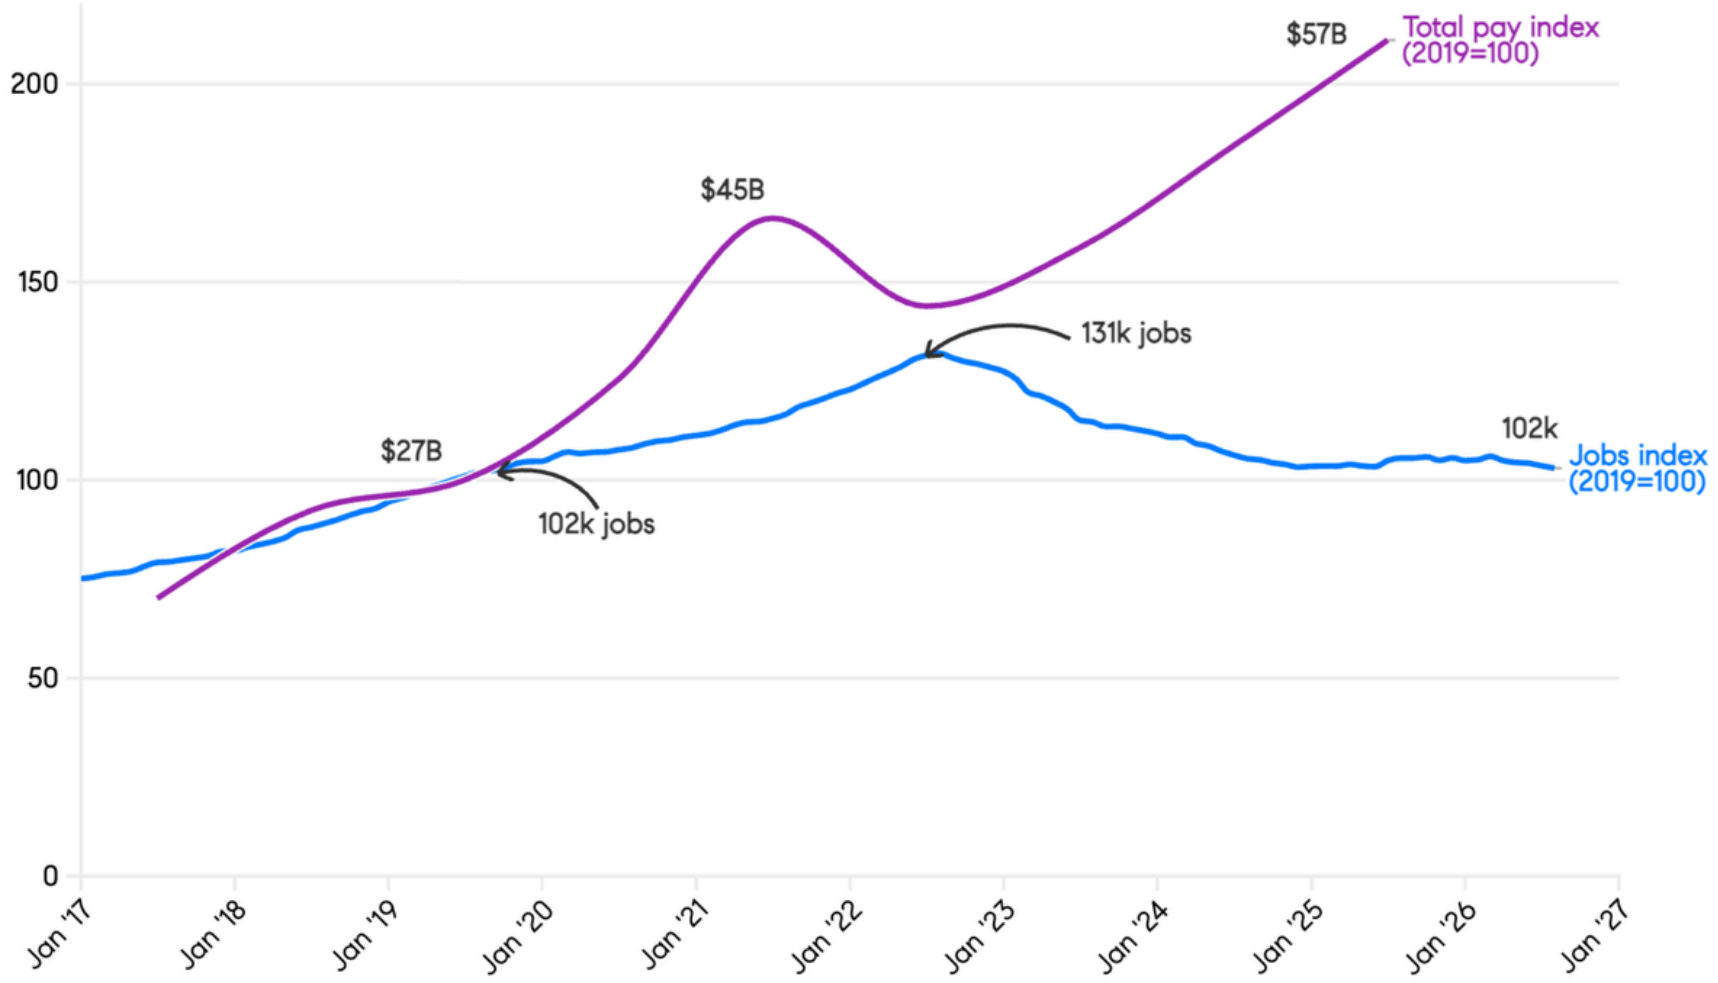

Source: BLS Non-Farm Payrolls, Total jobs, seasonally adjusted

COMPASS INTERNATIONAL HOLDINGS

Tech Jobs vs Tech Payroll

Tech headcount in SF and San Mateo is back to 2019 levels. Tech payrolls are twice as big. For housing, that means fewer buyers with far more purchasing power. This implies continued strength at the high end of the SF and Peninsula market, even without job growth.

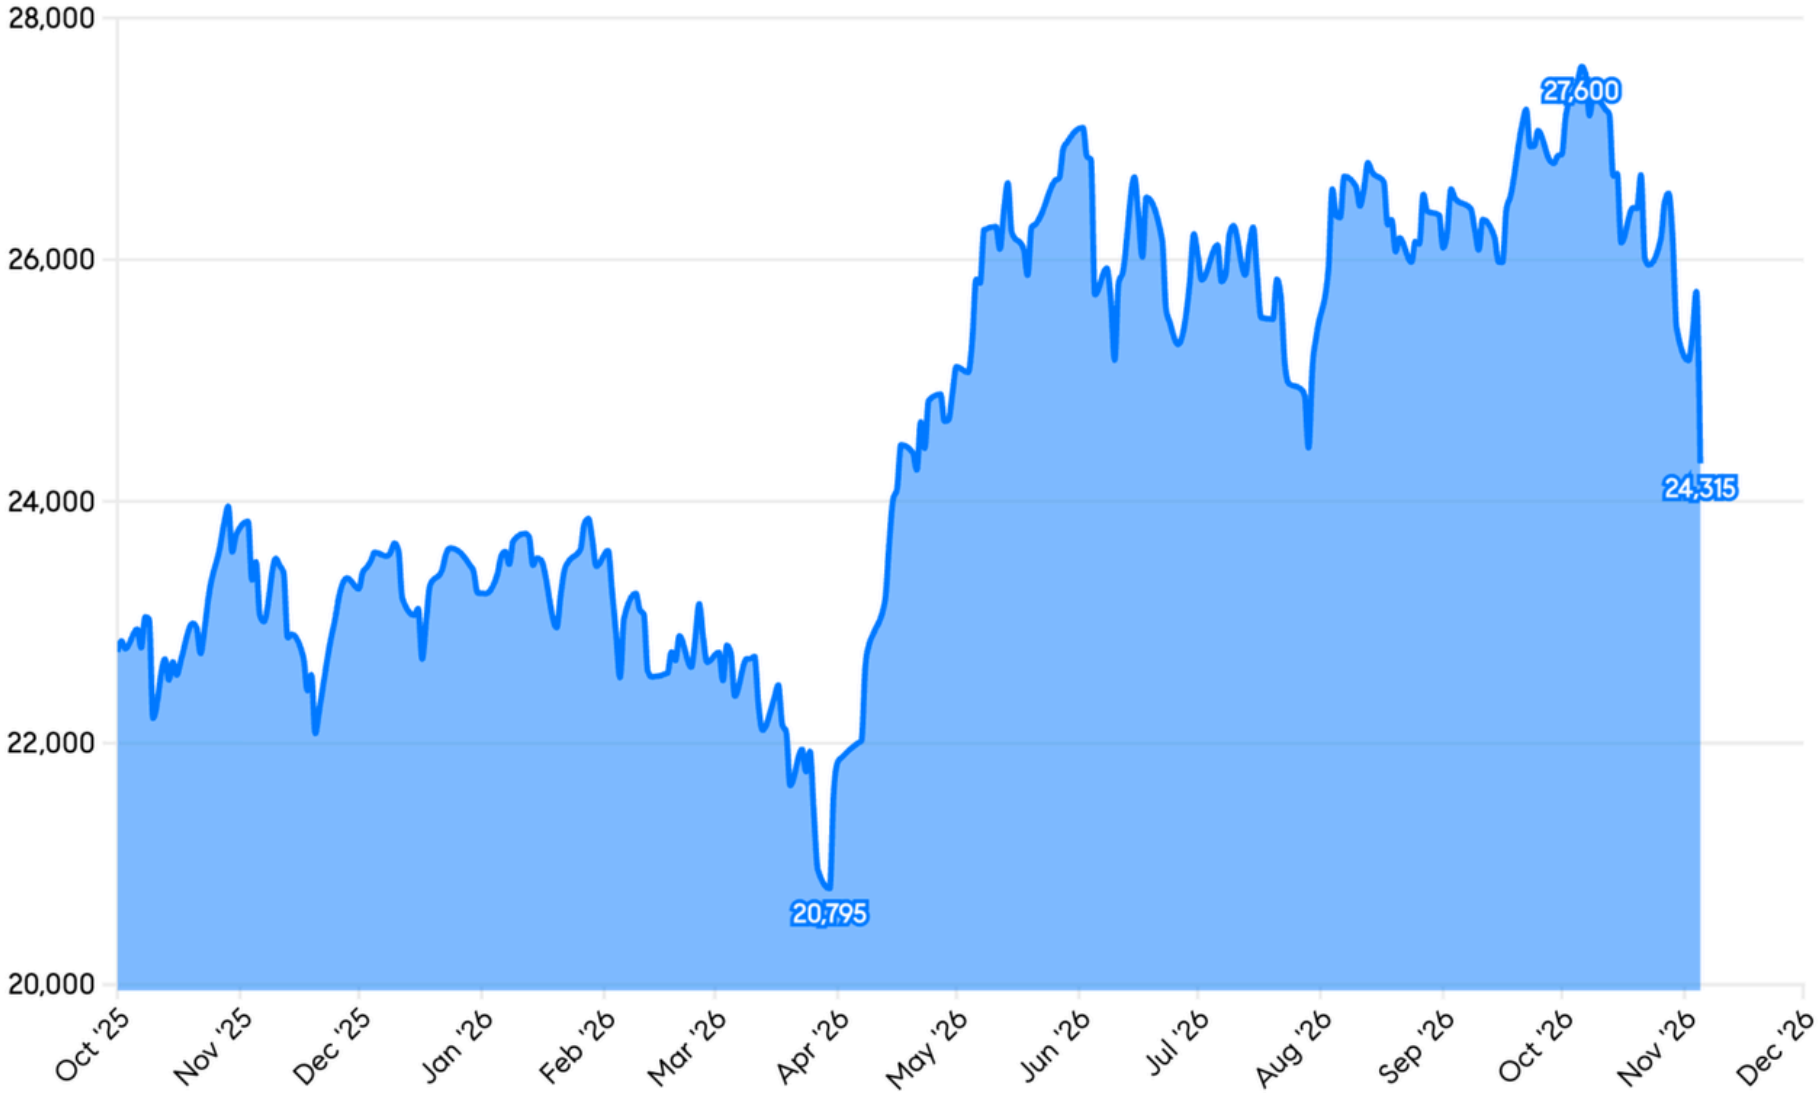

Sources: BLS Current Employment Statistics via FRED, seasonally adjusted); BLS QCEW, private NAICS 51, San Francisco + San Mateo counties, annual total wages (nominal, incl. vested stock). Indexed to 2019 = 100.

COMPASS INTERNATIONAL HOLDINGS

Tech Market Correction

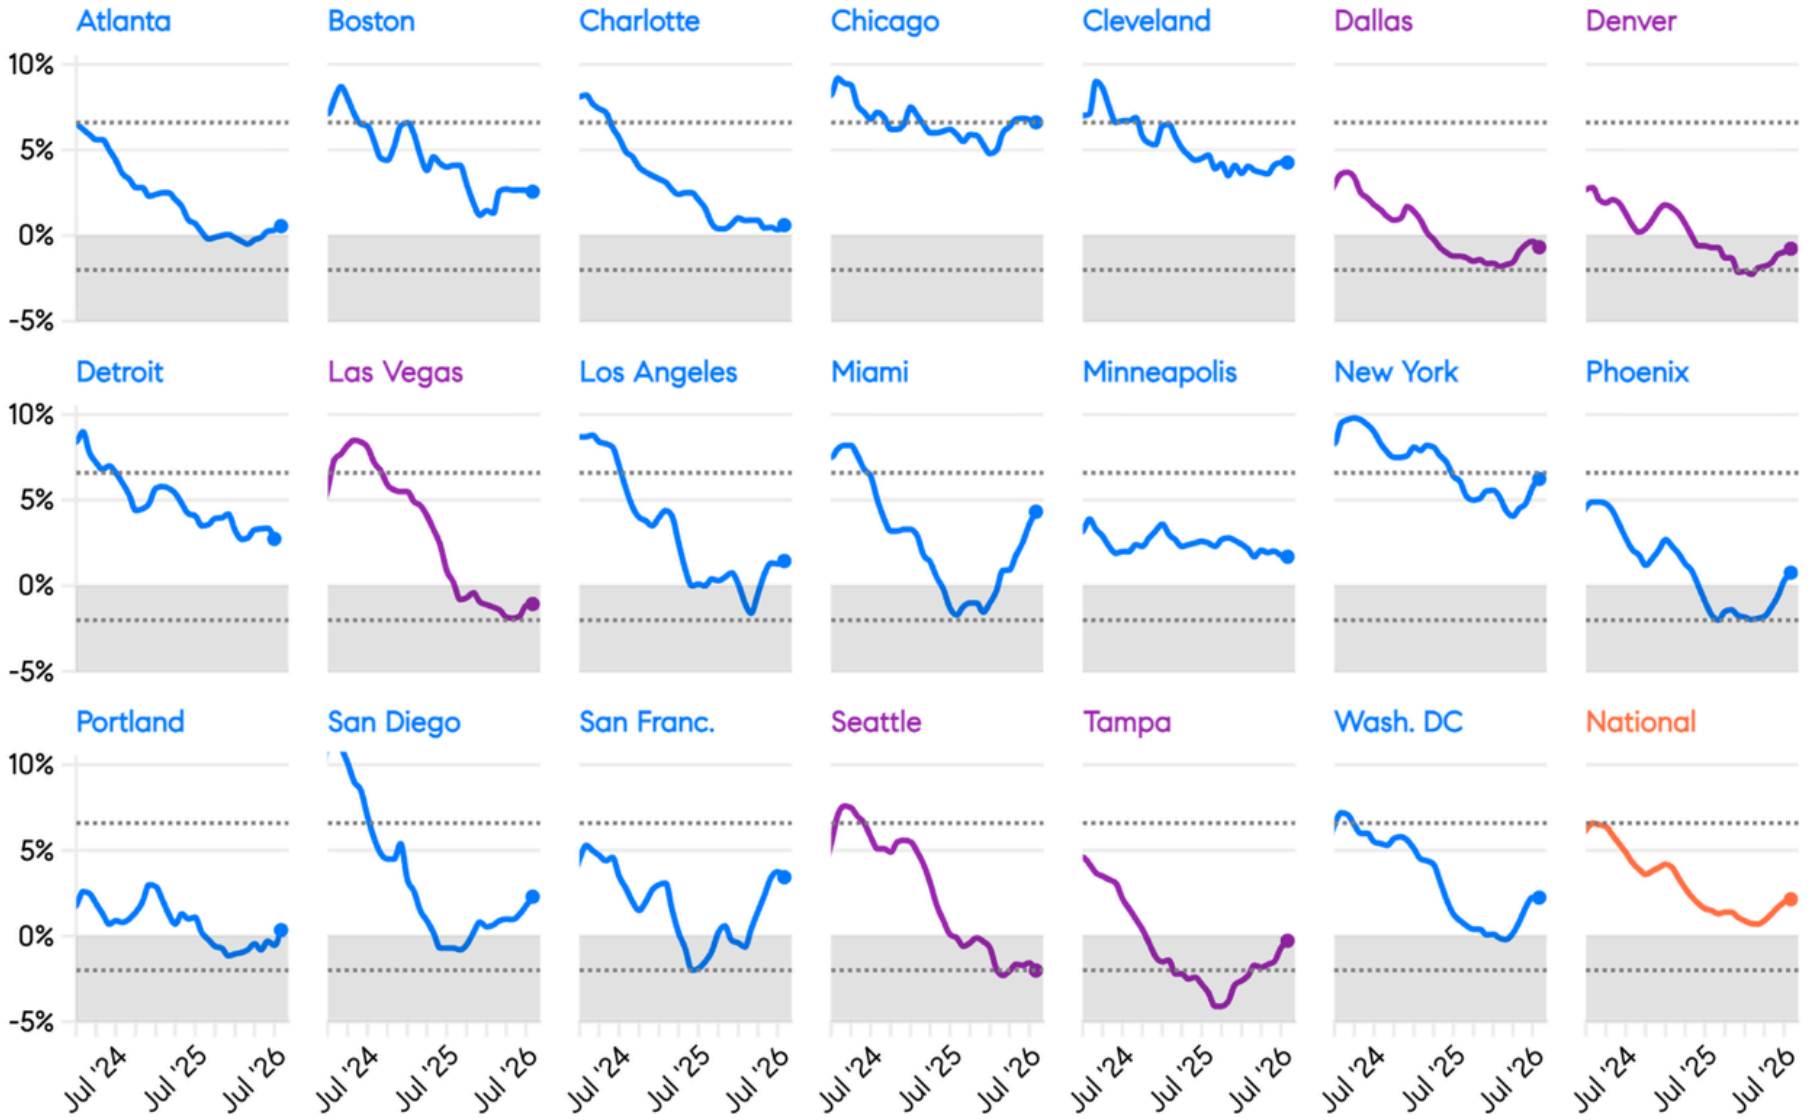

Based on the Nasdaq Composite's daily close, tech stocks have given back about 12% since early October. Stock compensation fuels much of the Bay Area's high-end buying, so a sustained tech pullback could cool luxury demand into year-end.

COMPASS INTERNATIONAL HOLDINGS

Sales Price Growth Stays Positive

San Francisco metro prices are is up about 3.5%, ahead of the national +2% pace. Five of 20 cities in Case Shiller Index are negative vs last year. Chicago (+6.6%) leads prices higher. Seattle (-2%) leads markets lower.

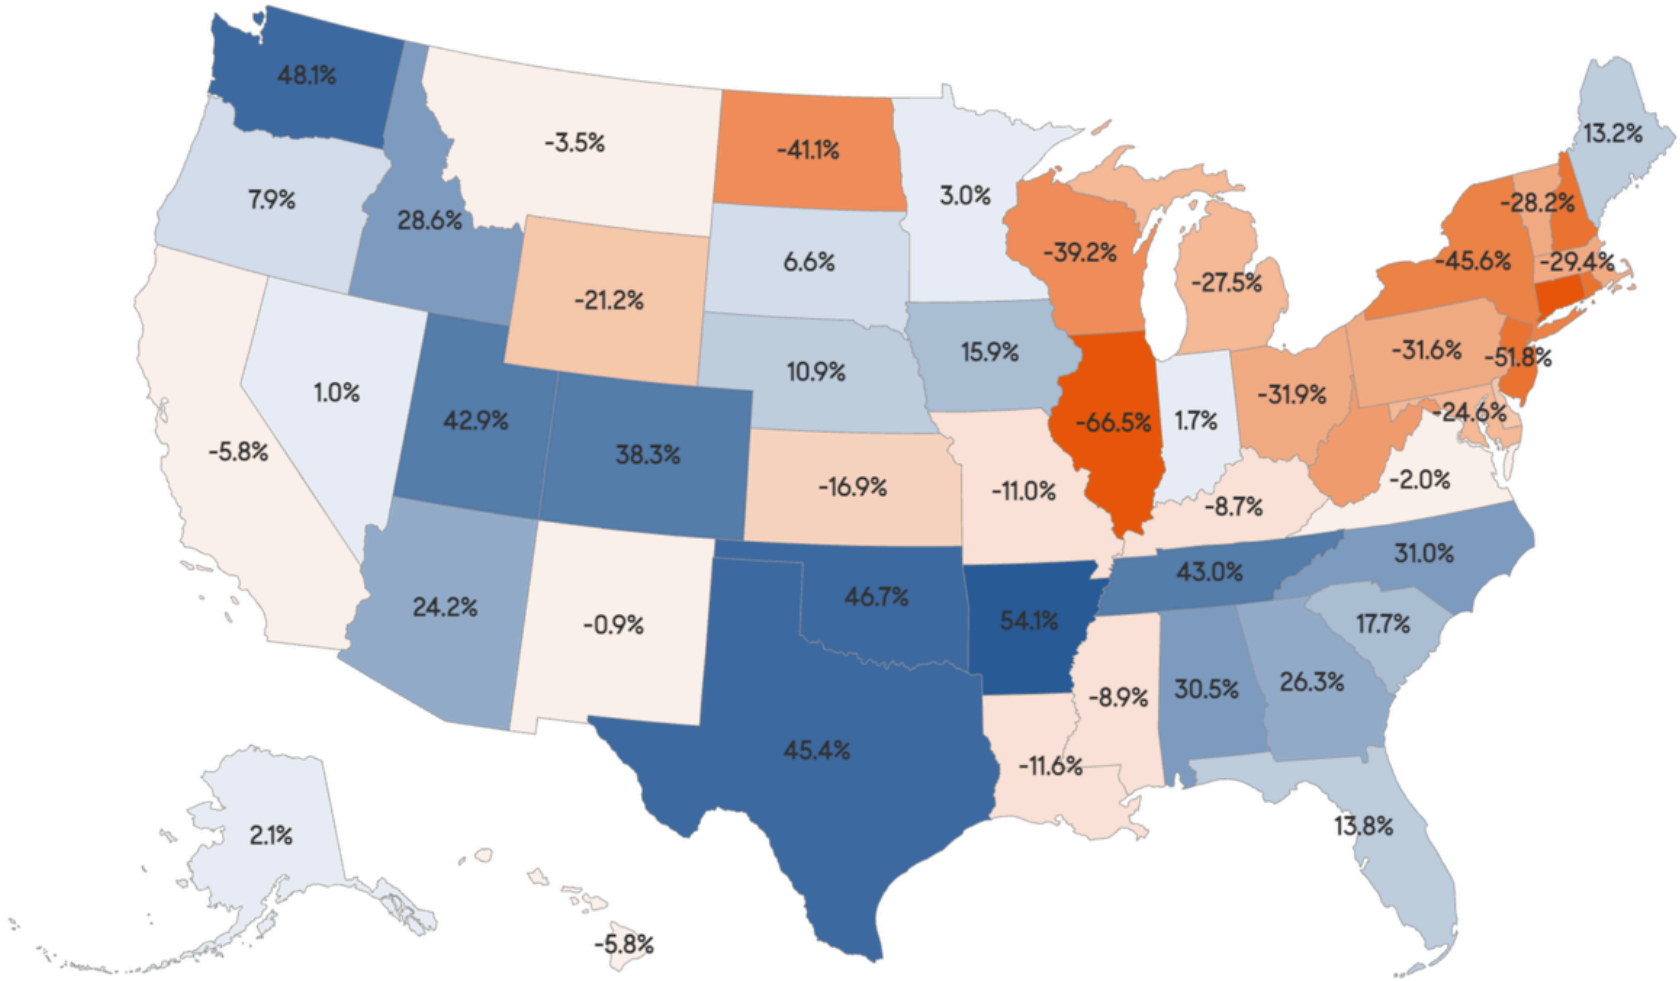

Source: S&P CoreLogic Case-Shiller · Blue cities have home price appreciation vs. August 2025. Purple cities have home price declines from August 2025. Dotted lines are top and bottom performing markets. Gray area is below 0%

COMPASS INTERNATIONAL HOLDINGS

The National Real Estate Market

Active inventory is far above 2019 levels in the South and Mountain West, where pandemic-era migration has cooled, and still well below 2019 in the Northeast and Midwest. California is about 6% below 2019.
